Table 1. Land Use for BCD Region

Category	*Acres*	*% of Total*
Developed areas		
Urban uses	75,000	4.29
Residential	21,000	1.20
Commercial	3,500	0.20
Industrial	12,600	0.72
Public and other	37,900	2.17
Agricultural uses		
Cropland and pasture	178,800	10.23
Forest and woodlands (excluding swampland forests)	861,740	49.30
Undeveloped areas		
Marsh and swampland	416,600	23.83
Inland waterways	140,800	8.06
Total	1,747,940	100.00

the islands to the mainland before 1940. Though considerable sums of money have been expended within recent years on the construction of long, narrow bridges to span the Atlantic coast, ocean recesses, rivers, and streams, the more remote islands, such as Sandy and Daufuski, continue to be inaccessible except by boat.[7] Most of the Sea Islands remain very sparsely settled despite the population growth brought on by recent industrialization and commercialization. The landscape is pastoral and mysterious compared to inland areas of the United States. Most islands are characterized by graceful palmetto trees, expansive green terrain, and atmospheric haze. The landscape in fact bears a striking resemblance to the topography of such coastal countries as Nigeria, Ghana, Angola, and Liberia, the tropical homelands of the Sea Islanders' ancestors.[8]

Electricity came to the more remote islands only as recently as the 1960s. Streetlights rarely line the narrow roadways of even the more developed islands, and in late evening the overhanging trees give the roads a ghostly allure. After nightfall it is literally impossible to see even two feet ahead.[9]
